-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

2. The information disclosure statement filed 1-16-2004 has been considered.

***Drawings***

3. The formal drawings are approved by the examiner.

***Title***

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Sugimoto et al (JP10-48968A). The image forming apparatus by Sugimoto et al. comprises charging means for charging an image bearing member; exposure means for exposing said image bearing member

Art Unit: 2852

that has been charged to form an electrostatic latent image; developing means for developing said electrostatic latent image with developer; transferring means, to which a transferring bias under constant voltage control is applied, for transferring a developer image on the image bearing member onto other member; test pattern forming means for forming a test pattern for image control on said image bearing member by supplying developer by said developing means to an area on said image bearing member in which charging by\*said charging means is effected and exposure by said exposure means is not effected; test pattern detection means for detecting the test pattern that has been transferred to the other member by said transferring means; and control means for setting a value of the transferring bias upon transferring of the test pattern onto the other member in accordance with a surface potential of said image bearing member upon formation of the test pattern (abstract).

***Prior Art of Record***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yuu et al. (5,887,218) teaches pertinent prior art.

***Allowable Subject Matter***

8. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claims 5-11 are allowed.

***Contact Information***
